

GUIDELINES FOR POSTER PRESENTATION

The poster session(s) will be allocated sufficient time for presentation and discussion in **The Technical Program of 10th International Chemistry Conference in Africa (10 ICCA)**. The poster should be constituted considering the following points:

- Poster size : 90 cm wide, 120 cm long.
- The lettering should be simple, bold, and easily readable at distance of 1.5 meters.
- Include a heading with your poster title that includes your name and your affiliation.
- Poster should contain objectives of the research or project.
- Describe the methodology used to solve the problem or implement the program.
- Identify major findings or outcomes and their significance.
- State the conclusions.
- There should be a logical sequence to your display. For example: introduction, experimental method, development, and conclusions.
- Charts, drawings, photographs, and other visuals are encouraged because they enhance the effectiveness of your presentation.
- Each poster presenter should present during the poster session to talk to conference attendees about your work and to answer questions.
